Welding terms and symbols

Part 1. Glossary for welding, brazing and thermal cutting

PIAWAI BRUNEI DARUSSALAM

PBD 15 : Part 1 : 1994

Attention is drawn to the fact that this Brunei Darussalam Standard does not confer any immunity from legal obligations in any contract for compliance to the Standard.

The Brunei Darussalam Standards are subject to periodical review according to the current needs of the local industries to keep abreast of progress in the industries concerned. Suggestions of amendments will be recorded and in due course brought to the notice of the committees concerned.

Amendments issued since publication

Amd No.	Date of issue	Text affected

FOREWORD

This Brunei Darussalam Standard has been adopted from BS 499 : Part 1 : 1991 and prepared under the direction of the Technical Committee on Iron and Steel. It was endorsed by the Ministry of Development and was first published in 1994.

The glossary is arranged in classified sections and this layout makes it possible to find either a term to convey a particular meaning or, in conjunction with the alphabetical index, the meaning of a particular term. It is apparent, therefore, that considerable advantages are achieved over a purely alphabetical list of terms which presupposes knowledge of the term in question.

Chart showing the derivation of welding, cutting and allied processes are given in figures 1, 2 and 3. Appendices A to G give guidance on typical information to appear on a welding procedure sheet for various types of welding process.

Preferred and equivalent terms are given in bold type, non-preferred terms are given in medium type and deprecated terms are given in medium type with their status indicated.

Acknowledgment is made to the BSI for the use of BS 499 : Part 1 : 1991.

COMMITTEE REPRESENTATION

The Technical Committee on Iron and Steel was entrusted by the Ministry of Development for the preparation of this Brunei Darussalam Standard.

The members of the Technical Committee are as follows.

- | | | |
|-----|---|--|
| 1. | Pg Hj Matusin Bin Pg Hj Matasan | Ministry of Development |
| 2. | Awg. Hamdani Hj. Mohd Jamil | Ministry of Development |
| 3. | Dr. Faqir Gul | Institute Technology Brunei |
| 4. | Dr. Abdul Qayyum Malik | University Brunei Darussalam |
| 5. | Awg. Mansor Jaluddin | Maktab Teknik Sultan Saiful Rijal |
| 6. | Dyg. Masni Haji Mohsin | Ministry of Industry & Primary Resources |
| 7. | Mahendra Coomaraswamy | Pertubuhan Ukur Jurutera Akitek (PUJA) |
| 8. | Lawrie Harris | Cooper Macdonald & Partners |
| 9. | Chee Wah Tsang | Jurutera Tempatan |
| 10. | Nicholas Leong Soon Kong | Brunei Shell Petroleum |
| 11. | Dyg. Hjh Maihani bte
Hj. Abdul Hamid | Public Works Department |
| 12. | Lai Foo Juat | Public Works Department |
| 13. | Michael Khoo | Interline Roofing Co. (B) Sdn. Bhd. |

Foreword	Inside front cover	F. Typical information to appear on welding procedure sheets for fusion welding processes	101
Committees responsible	Back cover	G. Typical information to appear on a cutting procedure sheet for oxygen flame cutting	102
Glossary			
Section 1. Terms common to more than one section	6	Table	
Section 2. Terms relating to welding with pressure	15	1. Terms and symbols for main welding positions	55
Subsection		Figures	
21. Terms relating to more than one subsection	15	1. Chart of derivation of welding processes	3
22. Terms relating only to resistance welding	16	2. Chart of derivation of brazing processes	4
23. Terms relating only to pressure welding	38	3. Chart of derivation of thermal cutting processes	5
24. Terms relating only to ultrasonic welding	38	4. Root, fusion, penetration, weld junction and zones of typical welds	7
25. Terms relating only to diffusion welding	39	5. Examples of series spot welding	17
26. Terms relating only to explosive welding	39	6. Mash weld	19
27. Terms relating only to friction welding	40	7. Weld nugget	19
28. Terms relating only to magnetically-impelled arc butt welding	40	8. Vertical centre electrode	20
Section 3. Terms relating to fusion welding (welding without pressure)	41	9. Vertical offset electrode	20
Subsection		10. Angle offset electrode	21
31. Terms relating to more than one subsection	41	11. Cranked offset electrode	21
32. Terms relating only to arc welding	62	12. Time and pressure diagram for simple spot, stitch or projection welding	24
33. Terms relating only to gas welding	73	13. Time and pressure diagram for pulsation spot or projection welding	24
34. Terms relating only to aluminothermic welding	75	14. Time and pressure diagram for spot or projection welding, programme control	25
35. Terms relating only to electron beam welding	76	15. Time and pressure diagram for pulsation spot or projection welding, programme control	25
36. Terms relating only to electro-slag welding	80	16. Time and pressure diagram for spot welding, programme control with dual-pressure cycle	26
37. Terms relating only to light radiation welding	81	17. Time and pressure diagram for seam welding	26
Section 4. Terms relating to braze welding and brazing	82	18. Time and pressure diagram for step-by-step seam welding	27
Subsection		19. Time and pressure diagram for roller spot welding	27
41. Terms relating to braze welding	82	20. Time and pressure diagram for step-by-step roller spot welding	28
42. Terms relating only to brazing	83	21. Time and pressure diagram for straight flash welding	28
Section 5. Terms relating to testing	85	22. Generalized diagram of speed, applied force, axial movement and time for continuous drive friction welding	29
Section 6. Terms relating to weld imperfections	89	23. Generalized diagram of speed, applied force, axial movement and time for stored-energy friction welding	31
Section 7. Terms relating to thermal cutting	93	24. Angle centre electrode	36
Subsection		25. Swan-necked electrode	36
71. Terms relating to more than one subsection	93	26. Example of back-step sequence	41
72. Terms relating only to oxygen cutting	96	27. Example of skip sequence	41
73. Terms relating only to arc cutting	98	28. Examples of block sequences	42
74. Terms relating only to spark erosion cutting	98	29. Sketches of types of joints, types of weld(s) and weld preparations	43
75. Terms relating only to electron beam cutting	98	30. Gap, root face, root radius, land, included angle and angle of bevel for typical weld preparations	49
76. Terms relating only to laser cutting	99	31. Examples of toes, legs and weld widths	51
Appendices		32. Roots of typical weld preparations	52
A. Typical information to appear on a welding procedure sheet for flash welding	100	33. Actual throat thickness and design throat thickness of typical welds	53
B. Typical information to appear on a welding procedure sheet for spot welding	100		
C. Typical information to appear on a welding procedure sheet for seam welding	100		
D. Typical information to appear on a welding procedure sheet for projection welding	100		
E. Typical information to appear on a welding procedure sheet for friction welding	101
